SR-126 Closures

The \$10 million project involves replacing deteriorated concrete pavement slabs with rapid-setting, high-strength concrete on the freeway mainline, placing concrete overlay on various on-and off-ramps, sealing cracks, grinding the pavement and restriping. The project is estimated to complete by the end of 2006. When completed, the result will be a smoother riding surface that will last longer and require less maintenance. A signed detour for the full eastbound SR-126 closure will be posted. Caltrans advises motorists to please, ***SLOW FOR THE CONE ZONE.***
